- ☒ This flyer will highlight streetscape activities for this week and a two-week look ahead. The next flyer will be delivered on 7-24.
- ☒ The construction of the King/Broad Street crosswalk between Berlin's and the Lining House begins Monday, 7-13. King Street between Broad and Queen Streets will **become two-way because there will be no thru traffic**. This crosswalk will be completed by Friday 7-17. The crosswalk will then be plated for curing purposes and King Street re-opened.
- ☒ In conjunction with the King/Broad Street crosswalk work, the north lane of Broad Street will also close on 7-13 with the two-way traffic shifted and temporary lanes delineated with toggles. The projects in this area include electrical signalization and conduit work and the partial construction of the crosswalks on the north side of Broad Street. These activities will take until the end of July to complete. **No large trucks will be allowed to travel below Queen Street during this period of time. Trucks on King Street must turn right onto Queen Street and trucks on Queen Street must cross over King Street and proceed on Queen Street.**
- ☒ Resumption of the electrical ductbank work in the southside lane of Queen Street between King & Meeting Streets will begin the week of 7-20.
- ☒ There remains only one lane of thru traffic in the block on King Street in the westside lane between Horlbeck Alley and Queen Street due to the following work: The Charleston Library Society sidewalk and driveway were demoed this week with electrical conduit work to follow. Please park in the 93 Queen Street Garage. The Gateway Walk step is a part of this renovation process. The electrical conduit work in the SCE&G entrance continues through 7-24. The SCE&G exit was demoed this week with curb installed and base to be poured next week. The Charleston Florist driveway has pavers installed this week and the driveway will cure until 7-15 when it will reopen. Bluestone installation is on-going into next week for the businesses between 178-180 King Street.
- ☒ Manhole cover replacement is underway in the block between Clifford and Queen Streets. Barriers and vehicles are in use to protect workers.
- ☒ Within the next two weeks, electrical conduit installation work will return to Fulton Street between Fulton Five Restaurant and Archdale Street. The Peterson Lot will not be affected by this work.
- ☒ Base pouring and Belgian block and paver installation will be completed this week for the King/Market Street crosswalk on the southwest corner (Saks). Next week the curing process takes place with the crosswalk reopening on Friday, 7-17.
- ☒ Reconstruction of the King/Market Street crosswalk on the northwest corner will begin the week of 7-20.

Forty is the old age of youth;
fifty is the youth of old age.
